

**ELGIN & HALL**<sup>®</sup>

BRITISH MADE

HEATING HOMES FOR GENERATIONS

## Welcome

An Elgin & Hall fireplace could easily be the most rewarding addition you make to your home and its value. Since the foundation of our parent company in 1963, we have successfully continued to grow from our base in the North East of England. Every design is lovingly created here in the UK.

Over 56 years of continuous innovation and development has provided us with a collection of fires and fireplaces to suit any interior and lifestyle, whilst always adhering to our founding principles of elegance and simplicity. This timeless quality means your chosen fireplace will always be comfortably in agreement with your tastes in furnishing and décor.

You can rest assured that our gas and electric fires are engineered, produced and tested for peak performance and reliability.

Our surrounds are designed to keep up with changing lifestyles and include features which only we can produce thanks to our investment in the latest machinery.

At the same time, we depend on our craft skills to hand finish and polish each marble, limestone or timber piece to perfection. It is this balance of innovation and heritage that makes your Elgin & Hall fireplace uniquely special.

As part of the BeModern® Group we manufacture a range of product in house, to include, surrounds, fires and fireplaces in marble, limestone and timber, as well as steel and cast stoves. Our bathroom and bedroom range suits both the traditional and contemporary home.

British Made

# Our Commitment

**Highest Standards of Quality** BeModern® furniture suppliers manufacture a world class product and continuous investment means we are recognised as the industry leader:

- Operating to ISO 9001:2015 accreditation
- Working closely with our supply partners to maintain the highest quality of raw materials.
- Investing in new technologies to provide innovative solutions.

## Our CSR Policies

We are aware that global climate change threatens the wellbeing of the natural environment and society. Whilst governments around the world move to agree on cutting greenhouse emissions, as a British manufacturer BeModern® works to minimise our own carbon footprint, cut emissions, reduce waste, recycle and reap the benefits of new, green ways of running a manufacturing business.

## Responsible Manufacturing

We are dedicated to minimising the environmental impacts of our manufacturing activities and seek to explore new ideas through eco innovation, for example our 2010 investment of over £1m in an eco-boiler to convert all waste timber into heat for our factories.

## Environmental Management

Having been accredited with ISO 14001:2015, the internationally recognised environmental management standard, BeModern® is committed to continually improving the effectiveness of our environmental management system.

## Transport

BeModern® logistics department makes thousands of deliveries each year, providing us with an opportunity to reduce the carbon footprint through regularly modernising our fleet to minimise noise and air pollution and training drivers in fuel efficient, safe driving.

## FSC® Timber

Wood is a significant material used across many BeModern® products. As demand for forestry products continues to grow, BeModern® plays its part in conservation by selecting over 75% of its raw timber from well-managed FSC® (Forest Stewardship Council®) recognised forests and holds full Forest Stewardship Council chain of custody certification.

1964

2019

# Our history so far

**1963**

Business starts as **Modern Trends** manufacturing fire surrounds in Hendon, Sunderland from a 5000sq.ft factory

**1964**

Business incorporated as BeModern®

**1967**

Expansion of BeModern® leads them to move to larger premises in Nile Street, South Shields

**1970**

Continued expansion leads to purpose built premises in Western Approach, South Shields

**1982**

BeModern® moves into the retail sector with the acquisition of Academy Crafts selling kitchen furniture

**1988**

BeModern® celebrates 25 years as a British manufacturer

**2001**

BeModern® acquires current Shaftsbury Avenue site and commences manufacture of marble surrounds (later extended in 2004 & 2013)

**2006**

BeModern® acquired design and product rights of **Elgin & Hall** - manufacturing hand painted, individually crafted fire surrounds in our Marcraft factory

**2009**

BeModern® acquires **Broseley** in Shropshire, to extend product choice into multifuel, woodburning, electric and gas stoves (later moved to Jarrow Head Office 2019)

**2012**

**Broseley Stoves** now manufactured at our Shaftsbury Avenue site

**2013**

BeModern® celebrates 50 years as a British manufacturer

**2014**

BeModern® headquarters move from Western Approach in South Shields after 44 years to Bedesway Jarrow after a major £1m makeover

**2018**

Elgin & Hall's Pryzm range is developed and released

**2019**

BeModern® successfully exhibit at the Hearth & Home show with a vast range of new product

**2020**

Elgin & Hall will continue to develop first class product and remain at the forefront of the fireplace industry

# Micro Marble Surrounds

Micro marble is a reconstituted mix of real marble pieces which are crushed and compacted together using resin to ensure a smooth surface finish.

This beautiful material has to be seen to be believed and to be fully appreciated first hand. The craftsmanship we devote to producing fireplaces in our UK workshops is matched by innovation.

# Limestone Surrounds

To create a graceful Limestone centrepiece, the quarried stone is expertly selected, cut, carved and smoothed to give your room a splendid feature. Limestone has been sought after down the ages due to its adaptability.

Our Limestone surrounds are manufactured from natural stone resulting in natural variation; this can include shading, veining, crystal markings and fossils. Therefore the Limestone surround you purchase may differ slightly from that shown in this brochure and have its own unique markings. This is the beauty of a natural stone product.

### Lighting

Smartsense Undermantel lighting is standard on all our Limestone surrounds.

### Caring for Limestone

Limestone needs special care and attention. It can stain and is sensitive to acids such as citrus juice, vinegar and household cleaning chemicals.

- Use a mild, neutral cleaner
- Avoid chemical cleaners, wax or polish
- Simply clean with warm water

# Micro Marble Gas Fireplaces

## Pre-Cast or Standard flue solutions

We have engineered a way to fit our new highly desirable gas fires into the standard 16 x 22" opening in a UK chimney breast or pre-cast flue, with no building work.

Whichever you prefer, the installation is all the more simple because all the fireplaces are made as a complete single unit. It has taken years of research to develop and perfect this innovative technology which puts Elgin & Hall a step ahead of the market.

### 22" Fire Switch Option

A selection of our electric fireplaces now come with multiple fire options. Look for the 22" Switch symbol within the inset electric fires section, from page 68. Bespoke your fireplace to your home.

### Flame effect

The flame-effect-only setting gives the impression of radiant logs and flickering flames with a choice of three flame effects and brightness levels without the added heat; perfect for warmer nights. The latest LED technology produces a play of warming fire like tones that are both realistic and cost effective.

### Flat to wall fix

This amazing transformation can be fitted in half a day at the most. Because it's electric no chimney or recess is required. It's just a case of simply plugging it in... and let the magic begin.

A white circular icon with the text "FLAT WALL FIX" written in a bold, sans-serif font inside.

# Timber Electric Fireplaces

Our timber electric fireplaces offer the ultimate convenience; they can be installed against any flat wall in any room. These innovative designs are a desirable centrepiece and the 2kW performance provides instant heat when you arrive home, which can supplement the central heating or allow you to heat just one room when the weather is on the cool side.

### Flame effect

The flame-effect-only setting gives the impression of radiant logs and flickering flames with a choice of multiple flame effects & brightness levels without the added heat; perfect for warmer nights. The latest LED technology produces a play of warming fire like tones with that are both realistic and cost effective.

### 7 day Thermostatic Remote Control

An Elgin & Hall inset fire should be effortless to operate. Which is why they come complete with a remote control\* to put different levels of heat, light and flame at your fingertips.

\*Unless otherwise stated

### Flat to wall fix

This amazing transformation can be fitted in half a day at the most. Because it's electric no chimney or recess is required. It's just a case of simply plugging it in... and let the magic begin.

# Inset Gas Fires

Once you've selected your new surround, you may choose to give it a warm glowing heart with an Elgin & Hall gas fire.

Our gas fires are controllable and convenient to operate with a discreet Smartslide control mounted on the top side or a manual control and igniter located behind the fret - flame height and heat output is at your control.

## Warranty

We provide a 5 year Warranty\* so you can be confident you have purchased and installed a high quality product.

\*Terms & conditions apply.

## Installation

Current regulations stipulate that all gas fire installations must be carried out by a Registered Gas Safe Engineer.

For information and advice on a Gas Safe Engineer, please contact your local Elgin & Hall retailer.

## Servicing

We recommend that all gas fires are serviced annually by a Registered Gas Safe Engineer to ensure continued operation and optimum performance.

This annual service is a condition of our 5 year warranty, and you must be able to show a record of approved servicing to be able to make a claim.

## Safety Assurance

### Flame Failure Device

All of our gas fires are fitted with a flame monitoring device ensuring that in the event of the flame going out during its operation, the gas supply to the fire is instantly cut off.

### Oxygen Depletion Sensor

For your safety, all our gas fires are fitted with an Oxygen Depletion Sensor. This will shut off the gas supply if the oxygen level in the room is too low or if there is a blockage in the chimney or flue.

### Quality Approved

All Elgin & Hall fires are manufactured in accordance with internationally recognised Quality and Environmental Management System Standards ISO 9001:2015 and ISO 14001:2015 guaranteeing responsible working and product quality.

## Accessories

### Xtra Canopy

The Xtra canopy kit\* "tunes" the appliance to your flue to raise the efficiency by up to 8% on an open fronted fire.

\*Available on Slimline or Deepline Radiant models only

### Spacer Kit

The spacer kit fits to the rear of the fire to reduce the depth by 25mm. It is ideal for use with pre-cast flues.

### Handle Options

An easy grip\* attachment allows those with restricted movement to control the ignition & heat.

Matching colour handles are available in Brass & Chrome. A Black Smartslide handle is supplied as standard with Smartslide models.

\*Easy grip handle not suitable for Chollerton gas fire.

## Super Controllable

### Smartslide Control

The discreet Smartslide control mounted at the top right hand side makes your Elgin & Hall gas fire convenient to operate. To turn the fire on simply press down and release.

Likewise you can turn the fire off by lifting to its top position. The control's second function is to regulate the flame height and heat output.

Smartslide controls give you the freedom to change the fire picture from smouldering to blazing at a touch to suit your mood and desired room temperature.

### Manual Control

All our open fronted gas fires are available as manual control. Neatly concealed behind the fret, these controls allow you to regulate your heat output and flame setting before replacing the fret for a sleek finish.

The various types of flue and chimney require different size specifications of gas fire.

Whichever kind your home has, there is an Elgin & Hall gas fire to fit.

Gaze over the next few pages and you will easily identify which one is suitable for your home.

## Consider the fit

All of our gas fires require a chimney or flue to conduct expended gases to the exterior. To identify which type your house has and which model of fire will fit (slimline, mid-depth or deepline), check the simple descriptions below.

### Brick Chimney Flues Class 1

Easily recognisable from the stack above the roof line (usually with a pot or gas terminal).

Once the fire is sealed into the chimney cavity, any harmful gases are expelled up the chimney itself and out of the roof. Any of our gas fires can be installed here.

### Pre-Fabricated Flues Class 2

Identifiable by a metal flue and terminal on the roof, this flue system is suitable for all our gas fires. Piping from your flue right down to your fire transports the gasses from the fire and out of the house. Again this flue is suitable for installation with any of our gas fires.

### Pre-Cast Flues

Recognisable by a ridge vent on the roof line, and built from concrete or clay blocks, usually within the wall cavity, the expelled gasses are vented through this shallow passage and out of the roof. Pre-cast flues are perfect for our Slimline or Deepline \* Radiant gas fires.

\* Deepline Radiant fire suitable when installed with a 75mm rebated surround.

### Balanced Flue

Identified by a round flue installed directly through an external wall. Our balanced flue fire is completely sealed from the front, allowing air to circulate through the flue to the rear of the fire. Cold air is sucked into the fire to combust and the gasses are expelled via the same point. This fire is highly efficient due to its airtight installation and can be installed without a chimney breast.

# Choosing the right engine

## Open Fronted

### Slimline Radiant

Radiant gas fires pull in cold air through their open front, circulating it over the real flames and emitting it back into the room.

Install In:	Pre-Cast, Pre-Fab or Brick Chimney
Efficiency:	52% (58% with Xtra canopy)
Control:	Smartslide or Manual

EEC	F			
Heat Input:	Manual	Canopy	Low	Canopy
	Smartslide	6.75kW		3.5kW 3kW
Heat Output:	Manual	3.2kW	3.5kW	1.5kW   1.7kW
	Smartslide			1.3kW   1.4kW

### Deepline Radiant

Install In:	Pre-Cast*, Pre-Fab or Brick Chimney
Efficiency:	52% (55% with Xtra canopy)
Control:	Smartslide or Manual

EEC	F			
Heat Input:	Manual	Canopy	Low	Canopy
	Smartslide	6.75kW		3.5kW 3kW
Heat Output:	Manual	3.2kW	3.4kW	1.5kW   1.6kW
	Smartslide			1.3kW   1.4kW

### Deepline Convector

Hot air is transferred through the canopy to circulate the warmth around the room.

Install In:	Pre-Fab or Brick Chimney
Efficiency:	62%
Control:	Smartslide or Manual

EEC	F	
Heat Input:	Manual	Low
	Smartslide	3.5kW
Heat Output:	Manual	1.8kW
	Smartslide	1.6kW

## Glass Fronted

### Mid-Depth

A panel of ceramic glass prevents air from being sucked up through the front of the fire and directing heat up the chimney, meaning a higher percentage of convected and radiant heat is propelled back into the room.

Install In:	Pre-Cast, Pre-Fab or Brick Chimney
Efficiency:	82%
Control:	Smartslide
EEC	D
Heat Input:	High 3.7kW   Low 2.5kW
Heat Output:	High 2.7kW   Low 1.7kW

### Deepline

Install In:	Pre-Fab or Brick Chimney
Efficiency:	87%
Control:	Smartslide
EEC	C
Heat Input:	High 5.3kW   Low 2.7kW
Heat Output:	High 4.2kW   Low 2kW

### Chollerton

Install In:	Pre-Fab or Brick Chimney	
Efficiency:	16" = 83%   22" = 86%	
Control:	Smartslide	
EEC	16" = D   22" = C	
Heat Input:	High	Low
	16"	4.8kW
Heat Output:	16"	2.1kW
	22"	1.8kW

## Balanced Flue Glass Fronted

This glass fronted balanced flue gas fire is pleasingly traditional with a welcome efficiency of 86% and a cosy 3.3kW heat output.

Install In:	Balanced Flue	
Efficiency:	86%	
Control:	Smartslide or Manual	
EEC	C	
Heat Input:	High	Low
	Manual	2.9kW
Heat Output:	Manual	2.1kW
	Smartslide	2kW

\* When installed with a 75mm rebate surround  
Energy Efficiency Class (EEC)

# 16" Inset Gas fires

Our range of gas fires are available with an extensive choice of trims and frets to suit your style. Simply select your preferred collection, then choose your finish.

Fire Engine	(C) Inset Depth	Minimum Aperture in Chimney	Open or Glass Fronted	Xtra Canopy

Deepline H.E	198mm			<input checked="" type="checkbox"/>
Balanced Flue	186mm	N/A		<input checked="" type="checkbox"/>

## Exclusive Fascia Collection

The framework of the Exclusive trim has a flat face with a long bevelled edge that slopes down towards the fire. The trim is broad and slightly accented in profile to complement the four boldly curving bands of the fret.

In Brushed Steel, Brass, Chrome or Black, the harmony of the trim and fret creates a non-fussy but sympathetic note to a stylish interior.

Available finishes:

## Devotion Fascia Collection

The distinguishing feature of this range of designs is the Black finished framework bordering either side of the metal trim. This serves to provide a dramatic contrast which accentuates the Chrome, Brass, Nickel or Brushed Steel finish. The fret itself curves slightly outwards to add extra interest.

Available finishes:

# Elsie 960BF

## Balanced Flue inset wall mounted gas fire

The Elsie 960BF balanced flue gas fire is suitable for homes without a chimney. The highly efficient slimline hole in the wall fire can be installed onto any outside wall of the home and generates a contemporary and stylish centrepiece for the room.

This appliance can be installed directly into a cavity wall yet still provides a very deep fuel bed effect for a product of its type. Coupled with a reflective black glass lining, the gas fire delivers a captivating flame effect and beautiful ceramic log layout.

- Inbuilt convector box for cooler wall temperatures
- Balanced flue for cavity wall
- Reflective black glass
- Discreet slide control operation
- Easy to install – easy to service
- Deep fuel bed
- Flush fitting

Fascia Finish	Brushed Steel trim

### 22" Fire Switch Option

A selection of our 22" electric fires can be chosen to complement a collection of our electric fireplaces. Look out for the 22" Switch symbol within the Micro Marble electric fireplaces section from page 34.

### Benefits

With an electric fire you don't need to generate heat to enjoy its comforting glow. The LED flame effect only control option, lets you experience it any time of the day or year.

### Efficient

Enjoy the convenience of efficient, instantly controllable heat and clean maintenance free living. By itself the LED only effect consumes just 6 watts of energy.

### Manual Switches

Are easily accessible with main functions.

### 7 day Thermostatic Remote Control

An Elgin & Hall inset fire should be effortless to operate. Which is why they come complete with a remote control\* to put different levels of heat, light and flame at your fingertips.

\*Unless otherwise stated

# 16" Ember Inset Electric Fire

If you are looking to make impact with an inset electric fire in your home, Elgin & Hall recommend the Ember. Available in lustrous Black Chrome or Chrome, and now available to fit a 75mm rebate, this dynamic duo look stunning when framed within an Elgin & Hall micro marble surround.

# 22" Novus Inset Electric Fire

The 22" Novus electric fire has a contemporary trim in Black Nickel or Chrome finish and realistic log fuel bed. The modern design of the Novus trim beautifully frames the new realistic glowing log bed and creates a beautiful focus in any room. Available to fit a wide range of both Micro Marble & Timber surrounds.

Fascia Finish	Inset Depth Required	Back Panel Cut Out	Max Output	Control
Chrome or Black Nickel	165mm	W570 x H595mm	1kW / 2kW	Manual

## 22" Coretta & Novus Installation in to wall

**Step 1**

Ensure that the installation aperture dimensions are as to the below specification.

A) 165mm  
 B) 683mm  
 C) 585mm

**Step 2**

Swing the unit into the opening and rest the bottom of the fire onto the bottom of the recess.

**Step 3**

Gently push the fire backwards into the recess / surround until it is flush against the wall / panel.

**Step 4**

The spring clips will keep the fire in position. Then attach trim of choice.

- E) Rear Height 500mm

# Beacon Stove

A freestanding lightweight stove made from timber, but with the distinct appearance of steel, the Beacon offers an ultra realistic flame effect and glowing log bed. Conveniently control the 2kW heat output with the 7 day programmable thermostatic remote control.

Finish	Matt Black
Max Output	Up to 2kW
Control	7 Day Thermostatic Remote Control

## Small

- A) Width 486mm
- B) Height 599mm
- C) Depth 286mm

## Large

- A) Width 586mm
- B) Height 599mm
- C) Depth 286mm

## Hearth Options

Slim hearths are 240mm deep, deep hearths are 400mm.

BESPOKE SIZES. Ask your local retailer for more information.

## Smartsense Lights

Undermantel Smartsense lighting is available on many of our surrounds.

*Find your local retailer*

Once you have chosen your favourite surround, picked the finest fire and measured up to ensure it will fit, it's time to visit your local showroom.

Admiring these British designed and manufactured fireplaces first hand is the best way to understand their quality and craftsmanship. Why not take paint charts, fabric samples or photos of your room to match with the surrounds.

If you need advice, you can trust the experience of our independent retailers.

To find your local retailer visit our website or call us.
